

UniBudget : Tresor Demanou and Audrey Keigoum (team 18)
Student budget tracker built with Flutter (EMA WS25/26).
Features:

- * Firebase Authentication (email + password)
- * Local demo mode fallback
- * Dashboard with monthly summary, quick tools, and recent transactions
- * Dark mode toggle

See ROADMAP.md (<https://github.com/Duchrist2002/EMAWS2526/blob/master/ROADMAP.md>) for future
How to run

```
flutter pub get
flutter run
flutter run -d chrome
```

Demo mode

If Firebase is not configured, the app runs with an in-memory demo account:

- * email: student@uni.de
- * password: 123456

You can also create a new account from the Sign-Up screen. State resets on reload.
Firebase setup

1. Create a project at the Firebase console and enable Email/Password authentication.
2. Install the CLI and generate config:

```
dart pub global activate flutterfire_cli
flutterfire configure
```

This overwrites lib/firebase_options.dart with your project configuration. The app will then
Project structure

- * lib/core/: theme and controllers
- * lib/models/: data models
- * lib/services/: authentication services
- * lib/screens/: ui views (login, signup, dashboard)
- * lib/widgets/: reusable ui components
- * lib/main.dart: entry point
